ABDUL HADI

Computer Engineering Student | Paris, France

abdulhadi7961@gmail.com | github.com/hadi-ce04

PROFILE

Computer engineering student at FAST-NUCES Islamabad, currently attending the Digital Innovation Track at EPITECH Paris as an exchange student. Interested in AI, computer vision, robotics, and software engineering.

EDUCATION

EPITECH Paris

2026 | Academic exchange

Digital Innovation Track: programming, web development, and collaborative projects.

FAST National University of Computer and Emerging Sciences

BS Computer Engineering | Islamabad, Pakistan | 2025 - Present

SELECTED PROJECTS

StudySync

Study productivity web app exploring tasks, focus sessions, and collaboration. React, TypeScript, WebSockets.

Robot Vision

Real-time object detection experiment using a camera, Python, YOLO, and OpenCV.

AgentGate

Hackathon prototype exploring baseline-versus-candidate AI-agent configuration evaluation.

Mission Control

Interactive space-themed portfolio built with JavaScript, Three.js, and Vite.

TECHNICAL SKILLS

Programming:	Python, C++, JavaScript, TypeScript
Web:	HTML, CSS, React, Three.js
AI and vision:	OpenCV, YOLO, AI agent evaluation
Tools:	Git, GitHub, Linux, Docker

ACTIVITIES

Hackathon participation and international project collaboration (2026).

Portfolio: view project details and learning reflections on the accompanying website.
